

IT TOOL

PRACTICAL 1

CREATING ACCOUNT, REPOSITORY ON GITHUB AND CLONING REPOSITORY IN GITHUB PAGE

A) to create an account on hithub

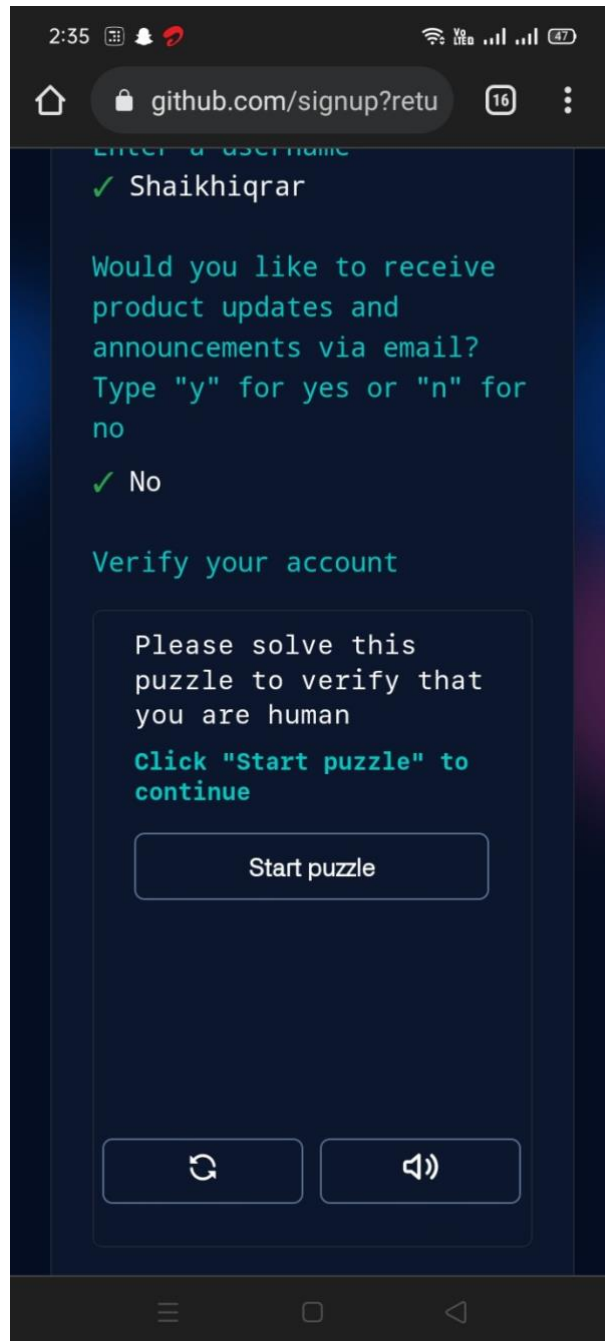

Step1: Go to <http://GitHub.com> in a web browser and then create a account. First write a email, create a password and surname

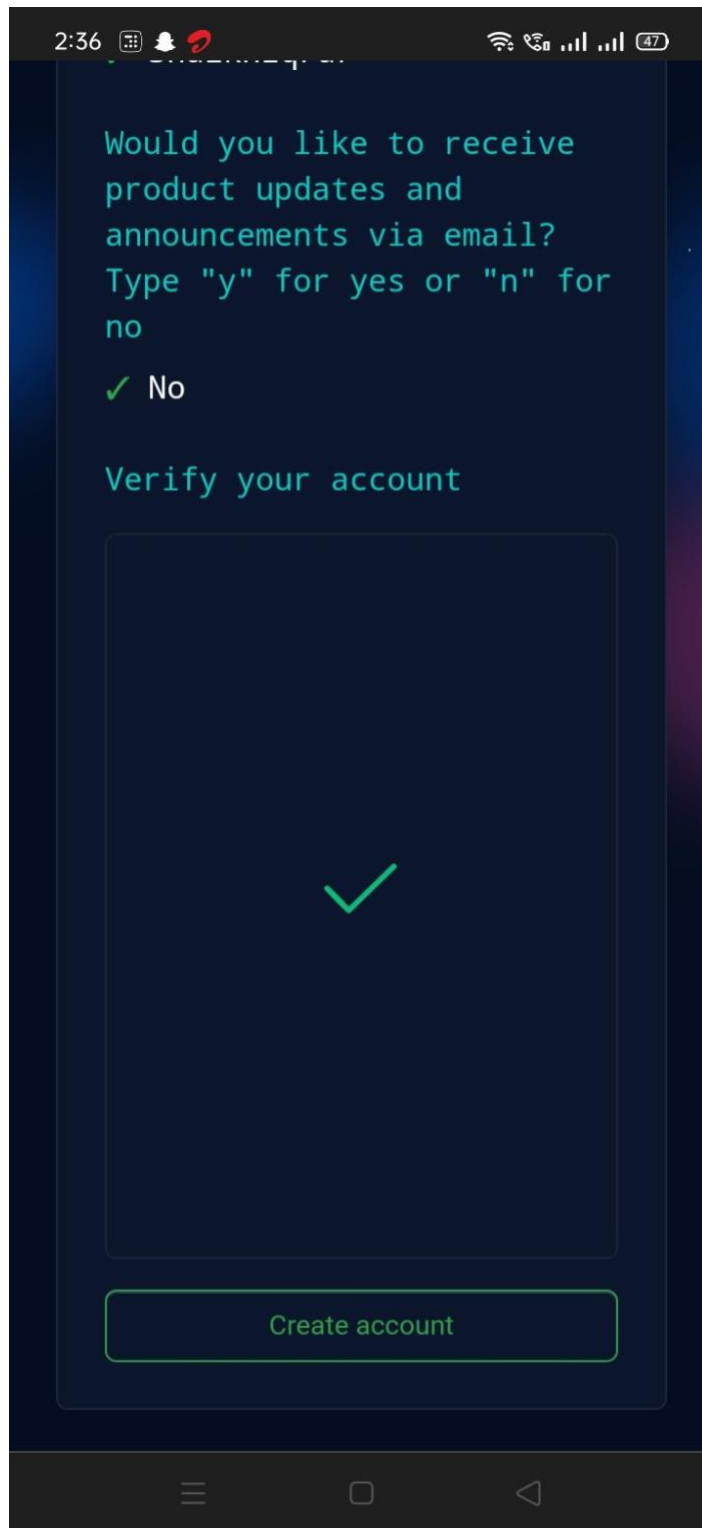

Step2: then there will be some questions and answers we have to fill it

Eg: 1) would you like to receive product updates and announcements via email? Type "Y" for yes or "N" for no?

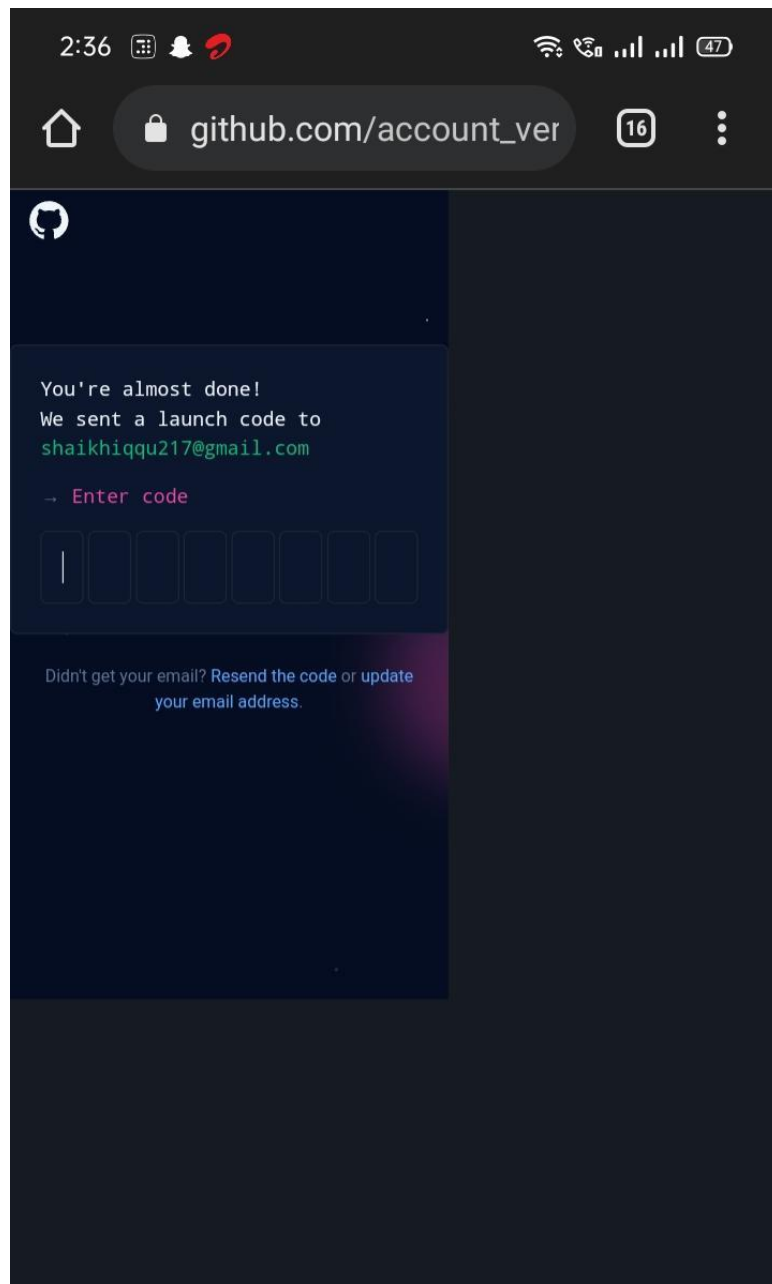

2) please solve this puzzle to verify that you are human

Step 3: At the end there will be an option called create an account we have clicked there

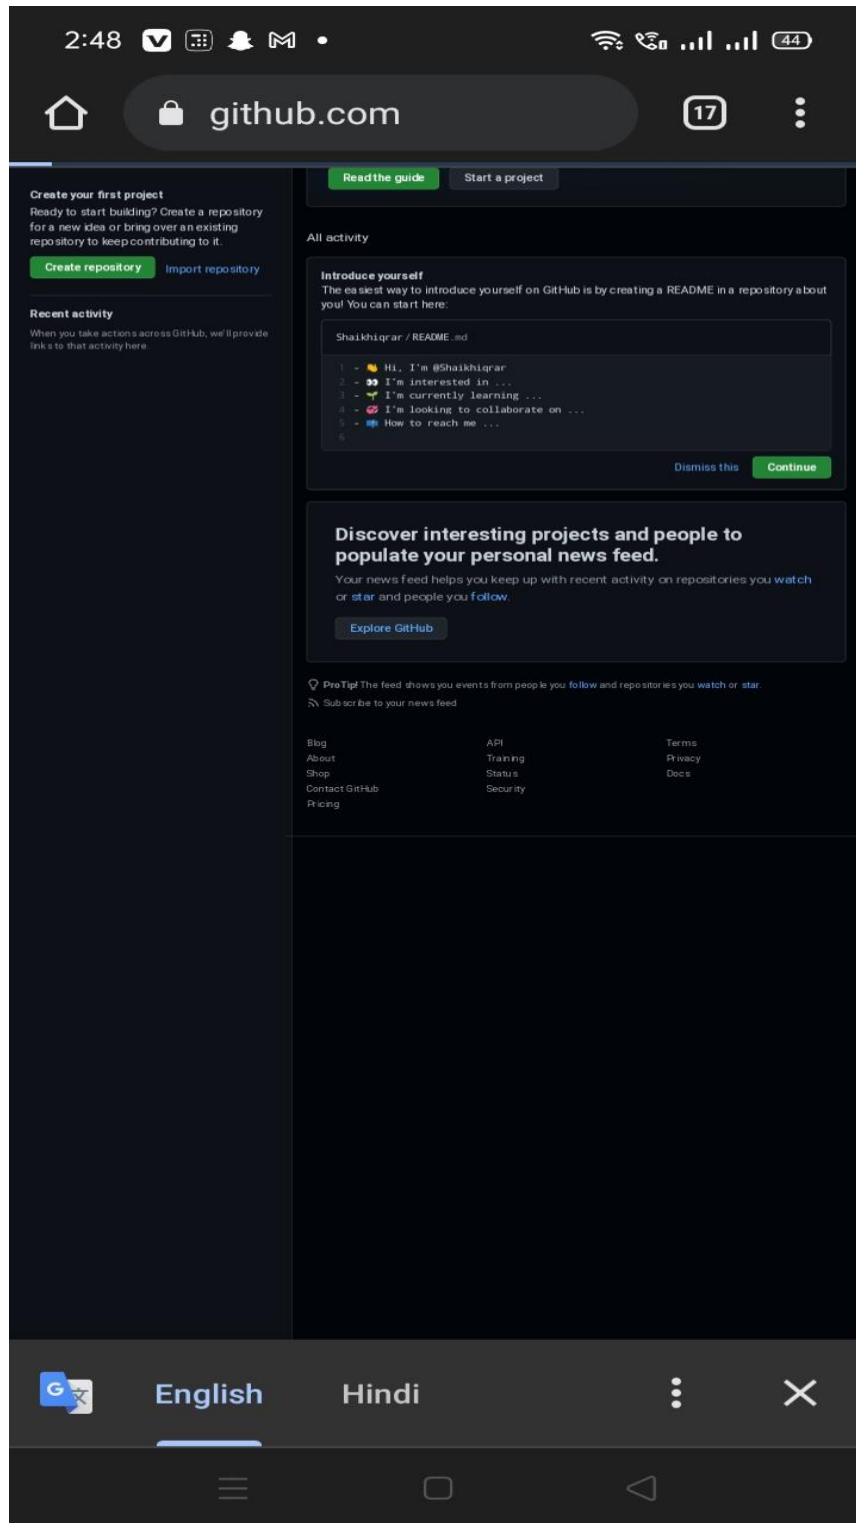

Step4: After on clicking “ created account” OTP will come on e-mail I’d ,we have to copy the OTP and paste on page

B) step to create repository

Step1: After copy and paste, new webpage will open In this page you will see your introduction yourself and option of creative preposition

Step2: After clicking new repository option, we will have to initialize some things like, naming our project, choosing the visibility etc. After performing these steps click Create Repository button.

github.com/new
